

Case Study:- DHL EXPRESS

“After several successful facilities start ups with Mainway, they were a logical choice for our new flagship Toronto facility.” - Darryl Wettlaufer, DHL Express

Having your express items delivered on time and intact is paramount in the express parcel business and a differentiator for DHL Express and their competition. It requires a reliable conveyor solution, where ruggedness and dependability are expected.

DHL Expresses’ newly opened facility in Brampton, processes approx. 3,600 items per hour in the AM Operation and 2,900 items per hour in the PM, in a condensed time frame, allowing them to be on the road and at your doorstep first thing!
