

CASE STUDY

Mainway outperformed all its competition to become the solution that Chrysler chose

Mainway provided Chrysler with the most effective and cost efficient solution in the marketplace today.

SITUATION

The model change to accommodate the Neon, provided Chrysler with a major opportunity to upgrade its line operations and implement the latest ideas and technology in the marketplace.

CHALLENGES

1. Extremely constricted same of lineside
2. Provision of optimum worker safety under conditions marked by heavy fork lift traffic
3. Increasing demands from unions for ergonomically designed workspaces

SOLUTION

1. Mainway installed 60 Flow Tilters™ because the over and under capabilities of this equipment provides the best utilization of space, minimizes fork lift traffic and is ergonomically outstanding in it's performance.
2. Once installed, the Flow Tilters™ had the capability of handling a multitude of different containers.
3. Mainway customized the units with further safety features specifically, accordion bellows (a roll-up guard), safety screens, and emergency lock-up stops.

RESULTS

Mainway outperformed all its competition to become the solution that Chrysler chose. Mainway provided Chrysler with the most effective and cost efficient solution in the marketplace today.
